

## No Hassle Replacement limited warranty™:

### How does it work?

The No Hassle Replacement limited warranty offers a one-time new equivalent replacement unit should the compressor, outdoor coil or heat exchanger fail due to defect during the No Hassle Replacement period. The No Hassle Replacement limited warranty applies to deluxe products and varies in length of limited coverage – up to 10 years to the original purchaser.

### What does that mean to your customers?

Simply this: If the compressor, outdoor coil or heat exchanger fails during the No Hassle Replacement limited warranty period, the customer has the option to:

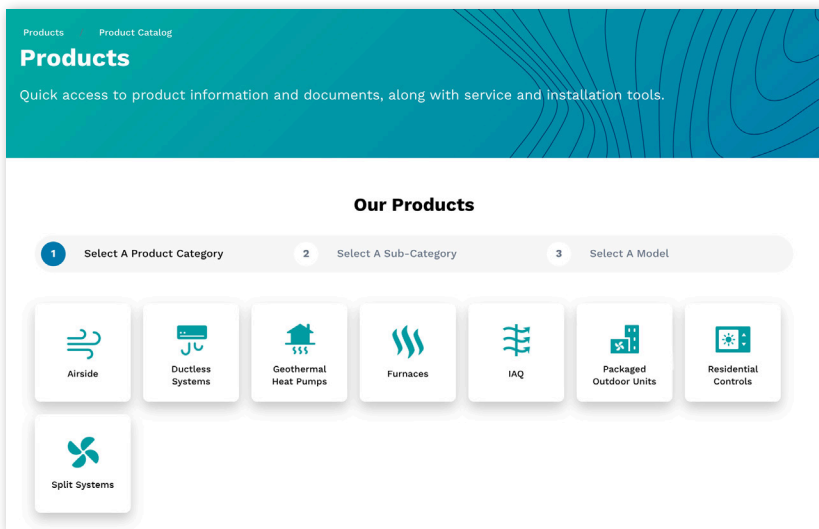

1. Replace the unit.
2. Repair the unit.

It's a powerful selling tool that offers homeowners peace of mind. Use this superior warranty to build value in the products you sell. Mention it on every sales call.

Read the warranty certificate for details. Make sure you understand this important warranty before your next sales call. This warranty offers extra coverage in addition to the standard product limited warranty. Restrictions apply. See the most current and complete warranty certificate for further details.

## Comprehensive Online Product Catalog!

With the online Product Catalog, it's easy to access detailed information about the complete line of Tempstar® products via the Internet on your laptop, tablet or smartphone.

### Access Instructions:

- Go to Tempstar.HVACpartners.com.
- Click on "Products" at the top of the screen.
- Scroll down to "Product Catalog" and you're there.

Or... Scan this QR code with your smartphone.

## RESIDENTIAL HEATING & COOLING PRODUCT AT-A-GLANCE FOLDOUT

It's Easier to Find Split-System Matches... with Our Online Database!

**TEMPSTAR®**  
Heating and Cooling Products

The process of matching split systems can be time-consuming and lead to information overload. Now you can search for Tempstar® equipment using our online database for split system air conditioning and heat pump combination ratings.

### How to find it:

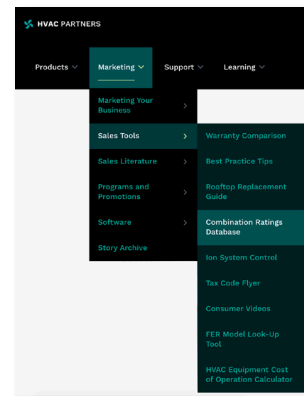

- Visit Tempstar.HVACpartners.com and click "Marketing" at the top of the screen.
- Scroll down to "Sales Tools" and select "Combination Ratings Database" from the menu.
- Or scan this QR code with your smartphone.

### It's Easy to Use!

Specific to Tempstar systems, the database incorporates these user-friendly features:

- 2023 SEER2 ratings are now available.
- Drop-down lists showing all model numbers, so there's no need to type in part of a model number.
- Option to specify indoor (coil) model, or search all indoor models.
- Option to specify furnace model, or search all furnaces.
- Option to search with a minimum SEER/SEER2.
- Export an unlimited number of results to an Excel file for even easier sorting and comparing.
- Includes combinations that are "archived" in the AHRI database.
- AHRI reference numbers are included for every combination.

The database pulls data directly from AHRI but simplifies the user interface and makes it easier to find what you're looking for. When a given model is no longer in production, the combinations are still retained in the database. If you have new old stock—new (unused) equipment that's been in inventory so long that AHRI has dropped the combination—this new database makes it easy to find.

Best of all, using the database allows you to make the results as broad or as narrow as you wish and makes it easy to drill-down on the specific equipment you're looking for without wading through every brand in the industry.

\*Third-party testing (2012, 2007) shows >99% inactivation for the type of virus that causes common colds, Streptococcus pyogenes and human influenza. Airborne particles must flow through your HVAC system and be trapped by the MERV 15 filter to be inactivated at 99%. The Tempstar DGAPA air purifier achieves a MERV 15 rating based on third-party testing (2012) showing 95% of particles size 1.0 to 3.0 microns captured and 85% of particles size 0.3 to 1.0 microns captured.

Note: For information regarding furnace or fan coil options that can increase the energy efficiency of selected Tempstar air conditioners (SEER and EER) and heat pumps (SEER, EER and HSPF), refer to [tempstar.hvacpartners.com/marketing/sales/tools/combination-ratings-database](http://tempstar.hvacpartners.com/marketing/sales/tools/combination-ratings-database)

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® specifications. Ask your distributor for details or visit [www.energystar.gov](http://www.energystar.gov)

\*\* Maximum Strength Warranties include: - Tempstar® gas and oil furnaces, and R-410A based air conditioners, heat pumps, coils, and small packaged products carry a ten (10) year limited warranty on parts (including compressor and coil) to original owner when installed in a residential application and properly registered within ninety (90) days after original installation. Heat exchangers carry a 10 year, fifteen (15) year or lifetime limited warranty. Timely registration required for 10 year limited parts warranty and lifetime limited heat exchanger warranty to original owner (registration is not required for 10 year or 20 year limited heat exchanger warranty). Limited warranty period is 5 years for parts and twenty (20) years for heat exchanger to original owner if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration. Please see warranty certificate for further details, restrictions, and registration instructions. - The No Hassle Replacement™ limited warranty provides a new equivalent replacement unit to the original owner should the compressor, condenser coil or heat exchanger fail due to defect during the No Hassle Replacement period. Split system units must be matched with an approved indoor coil or fan coil with TXV or piston metering device. Written authorization from your Tempstar distributor is required prior to replacing any unit. This warranty is a supplement to the standard product limited warranty. Restrictions apply. See [Tempstar.HVACpartners.com](http://Tempstar.HVACpartners.com) for the most current and complete warranty certificate for further details.
