FEATURING:

The Atmospheric Vent FVIR Defender Safety System® Models Feature:

- Bradford White ICON System[®] Intelligent gas control with proven millivolt powered technology and built-in piezo igniter. A standard, off-the-shelf thermopile converts heat energy from the pilot flame into electrical energy to operate the gas valve and microprocessor. No need for external electricity.
 - Enhanced Performance Proprietary algorithms provide enhanced First Hour Rating and tighter temperature differential.
 - Advanced Temperature Control System Microprocessor controls burner operation for consistent and accurate water temperature levels up to 160°F (71°C).
 - Intelligent Diagnostics Exclusive multicolor LED light indicates operation status/service required.
- **Defender Safety System**[®] Designed to be the safest, most reliable flammable vapor ignition resistant system in the industry with a proven track record since 2003.
 - Advanced ScreenLok[®] Technology Flame Arrestor Design—Flame arrestor is designed to prevent ignition of flammable vapor outside of the water heater.
 - Resettable Thermal Switch—Proven and reliable bimetallic switch prevents burner and pilot operation in case of ongoing flammable vapors burning inside of the combustion chamber or restricted air flow.
 - Maintenance-Free No regular cleaning of air inlet openings or flame arrestor is required under normal conditions.
 - Sight Window Offers a view into the combustion chamber to observe the operation of the pilot and burner.
- Vitraglas[®] Lining with Microban[®]—An exclusively engineered enamel formula that provides superior tank protection from the corrosive effects of water; and with Microban® antimicrobial product protection to help prevent the growth of bacteria, mold and mildew on the surface of the tank lining.
- Hydrojet[®] Total Performance System—Sediment reducing device that also increases first hour rating of hot water while minimizing temperature build-up in tank.
- 3x4 "Snap Lock" Draft Diverter—Allows either 3" (76mm) or 4" (102mm) vent connections with inputs of 40,000 BTU/Hr. or less. Over 40,000 BTU/Hr. has the 4" (102mm) "Snap Lock" Draft Diverter.
- Water Connections—NPT factory installed dielectric waterway with heat traps.
- Protective Anode Rod—Provides added protection against corrosion for longterm, trouble-free service.
- Low Restrictive Brass Drain Valve—Durable tamper proof design.
- NOx Emissions—Less than 40 ng/J.
- **Small Diameter Models Available**—for limited space installations.
- **T&P Relief Valve**—Installed.

*May vary by region

6 or 10-Year Limited Tank Warranties / 6 or 10-Year Limited Warranty on Component Parts.

For more information on warranty, please visit www.bradfordwhite.com

For products installed in USA, Canada, and Puerto Rico. Some states do not allow limitations on warranties. See complete copy of the warranty included with the heater.

Microban[®] antimicrobial product protection helps prevent the growth of bacteria, mold and mildew that may affect the product. The built-in antimicrobial properties do not protect users or others from disease-causing organisms. Microban[®] is a registered trademark of Microban Products Company.

Propane models feature a Titanium Stainless Steel propane burner. For Propane (LP) models change suffix "N" to "X".

For 10 year models, change suffix from "6" to "10".

Based on manufacturer's rated recovery efficiency.

 Models feature optional top T&P location and must be specified when ordering. Note: RG230S6N and RG250L6N do not have top T&P option.

Uniform Energy Factor and First Hour Rating is based on the latest AHRI directory listings.

General:

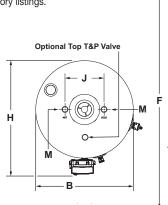

Meets NAECA Requirements.

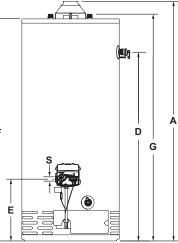

All gas water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All water connections are %" NPT (19mm) on 8" (203mm) centers. All gas connections are %" (13mm).

All models design-certified by CSA International (formerly AGA/CGA) to ANSI standard Z21.10.1.

Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement. Suitable for Water (Potable) Heating and Space Heating.

Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.
